

ASHRAE Montreal Bursary

The Montreal Chapter pursues its mission to support the next generation in the field of building mechanics by giving, through its foundation, two **\$600** bursaries to deserving students. One of these scholarships is for undergraduate university students (Concordia, ETS, McGill, Polytechnique, ...) and the second is for students in technical building mechanics programs (Ahuntsic, St-Hyacinthe, Trois-Rivières, Vanier, ...).

The following selection criteria will be considered for the granting of awards:

- Financial needs
- Involvement of the candidate in the field of building mechanics
- Quality of the presentation letter
- Academic Results
- Pursing studies, ie not graduating or going to University (for CEGEP students)

The introductory letter should be signed by the student and the ASHRAE student representative of his/her institution. It's important to specify your field of study and the number of academic years completed as of May 1st 2012.

Students wishing to apply should send their resume, a recent academic transcript and a presentation letter **before April 30th 2012** to:

ASHRAE Bursaries Montreal 2012
C. P. 81
Boucherville, Quebec J4B 5E6
